Initial Pitch

Concept:

Our initial concept is an interactive and education website/ forum that will help facilitate the communication between migrants, hosts and people that want to help migrants. The site will have the ability to change the language used on the site and also with messaging other site users. It will also include helpful resources such as help on how migrants can find work, food and schools. There will also be an interactive map that users can filter through different locations such as different types of food and the map can show users how to get to these locations.

A forum will be added that can help migrants contact there hosts and also other migrants. This will allow migrants to post about issues they have and can get in contact with other users that might be able to help them. Users will be able to link themselves with other users and build small communities within the site to help build a solid footing for migrants to build a new life for themselves in Dunedin.

The site will also contain an abundance of useful links and information on topics such as how people can help migrants, what help is currently available and also information hosts will need to know in order to help migrants. This site will be a complete resource for all people involved with migrants and the migrants themselves and will help ease migrants into there new lives in Dunedin with all the support they require.
